Native Wild Flowers

Edith Helen Curtis

Callicoon, New York

These plants are collected from the rugged hills of Sullivan County, New York and Wayne County, Pa. They are taken directly from their native haunts where the climate and soil are especially adapted to growing strong vigorous plants.

Actea alba (White Baneberry) 2 feet high. Blossoms clustered, white in terminal raceme, blooming in May, followed by a showy white fruit resembling doll's eyes. This plant grows best in shady rocky places.

15cts. each, \$10.00 per 100.

Anaphalis Margaritacea (Pearly Everlasting) 1 to 2 feet high. White flowers with yellow centers, blooming from July to October. Dry sunny places. 3 cts. each, \$2.50 per 100.

Antennaria plantiginifolia (Early Everlasting) 10 to 14 inches high. Small white clustered flowers, blooming in early May. Grows best in dry open places. 6 cts. each, \$4.00 per 100.

Aquilegia Canadense (Columbine) 12 to 16 inches high. Flowers red and yellow, blooming in May—very showy. This plant grows best in dry rocky places.

10 cts. each, \$8.00 per 100.

Arisaema triphyllum (Jack in the Pulpit) 18 to 25 inches high. Terminated by a spathe. Flowers small inclosed in spathe. Spathe often veined with purple, blooming in June. Best grown in damp shady places. Fruit a bright scarlet. 12 cts. each, \$9.00 per 100.

Asclepias cornuti (Milkweed) 3 to 4 feet high. Flowers a purplish red, clustered at top of stem, blooming in June. Dry sunny places. 5 cts. each, \$3.50 per 100.

Brunella vulgaris (Heal All) 4 to 6 inches high. Flowers a purplish blue, blossoming from July to October.

7 cts. each, \$6.00 per 100.

Chrysanthenum heucanthemum (Daisy) 12 to 18 inches high. Flowers having white petals with yellow centers—very showy. Open sunny places. 3 cts. each, \$2.50 per 100.

Clematis Virginiana (Travelers Joy) Vine having white clustered flowers. Seeds 5 cts. per packet.

Cypripedium acaule (Moccasin Flower) 12 to 14 inches high. Flowers a rose purple—very showy. This plant has two rather broad flat leaves at the base between which the flower stalk grows. Grows in dry shady places, leaf mold should be used. Grows well beneath evergreen trees.

20 cts. per clump \$2.00 per dozen. (limited)

Epigaea repens (Trailing Arbutus) Evergreen vine, having clusters of white or rose colored fragrant flowers. Grows in dry partially shady places, blossoming in latter April or early May. 25 cts. per clump, \$20.00 per 100.

Erythronium Ameri canum (Adder's Tongue) 8 to 10 inches high. Flowers bright yellow, blossoming in May—very showy, somewhat resembling a lily. Damp shady places.

5 cts. each, \$4.00 per 100

Gautheria procumbens (Wintergreen Berry) 4 to 6 inches high. A very pretty little evergreen plant, having white bell shaped flowers, blooming in July, followed by bright red berries—very showy. This plant takes a season to acclimate itself to new surroundings. Grow in a rich partially shady place.

10 cts. per clump, \$8.00 per 100.

Geranium maculatum (Wild Geranium) 10 to 12 inches high. Flowers purplish pink, blossoming in May and June. Grows best in partially shady places. 10 cts. each, \$8.00 per 100.

Geranium Robertianum (Herb Robert) 8 to 10 inches high. A biennial blossoming from June to September. Flowers purplish pink, growing best in rocky places.

10 cts. each, \$8.00 per 100

Hemerocallis fulva (Brown Day Lily) 12 to 18 inches high. Flowers light brown, blossoming in July. Grows best on sunny banks. 2 cts. each, \$1.00 per 100.

Hepatica triloba (Liverwort) A low plant having white or blue flowers, blossoming in April. Grow best in rich shady places.
5 cts. each, \$4.00 per 100.

Houstonia caerulea (Bluets) A biennial 3 to 5 inches high. Flowers pale blue with yellow centers, growing best in open grassy places.
10 cts. per clump (6 inches square),
\$8.00 per 100.

Impatiens pollida (Jewel Weed) 4 to 6 feet high. There are two varieties of this plant, the flowers of one are pale yellow and of the other spotted with orange—very showy. Blossoms in July and August. Best grown in damp partially shady places.
2 cts. each, \$1.00 per 100.

Inula Helenium (Elecampane) 3 to 6 feet high. Flowers large, yellow, very showy. Blossoms in July. Best grown in dry sunny places.
10 cts. each, \$8.00 per 100.

Linaris vulgaris (Butter and Eggs) 10 to 16 inches high. Flowers of two shades of yellow—very showy. Grows best in open places.
3 cts. each, \$2.00 per 100.

Lysimachia nummularia (Creeping Charley) A pretty vine, excellent for porch boxes. Flowers bright yellow, blossoming in June. Grow best in partially shady places.
5 cts. per clump, \$4.00 per 100.

Maianthium Canadense (Wild Lily of the Valley) 2 to 6 inches high. Flowers white in terminal raceme. Red berry in fall. Grows best in rich shady soil.
3 cts. each, \$2.00 per 100.

Mitchella repens (Partridge Berry) Small evergreen vine. Flowers white, the odor of which resembles that of the trailing arbutus. Blossoms followed by a bright scarlet berry which is very decorative.
5 cts. per clump, \$4.00 per 100.

Mitella diphylla (Mitrewort) 5 to 7 inches high. Flowers white in terminal raceme. Grows best in rich shady soil. Blossoming in May.
5 cts. each, \$4.00 per 100.

Muscari botryoides (Grape Hyacinth) 5 to 6 inches high, having long thin leaves. Flowers purplish blue, resembling grapes. This plant blossoms in early May. Best grown in sunny places. 3 cts. per clump, \$2.50 per 100.

Myosotis laxa (Forget-me-not) A low plant growing in wet places. Flowers blue with yellow centers, blossoming thruout the summer. 5 cts. per clump, \$4.00 per 100.

Ornithogalum umbellatum (Star of Bethlehem) 5 to 6 inches high, having long thin leaves. Flowers white, star shaped—very showy. This plant blossoms in June, growing best in sunny places.

3 cts. per clump, \$2.50 per 100.

Pedicularis Canadense (Wood Betony) 5 to 12 inches high. Flowers yellow and red growing on spikes—showy. This plant blossoms in May and grows best in dry partially shady places. 5 cts. each, \$4.00 per 100.

Podophyllum peltatum (Mandrake) 12 to 18 inches high. This plant has creeping rootstocks and fibrous roots. Flowers waxy pink or white, found under the umbrella shaped leaves. Fruit when ripe resembling an apple. 3 cts. each, \$2.50 per 100.

Polygala paucifolia (Fringed Polygala) 4 to 6 inches high. Flowers rose colored, blossoming in May and June. The leaves of this pretty little plant are a reddish purple. Grows best in rich partially shady places.

2 cts. each, \$1.50 per 100. (limited)

Polygonatum biflorum (Solomon's Seal) 1 to 2 feet high. Flowers yellow, bell shaped. Blossoms in May, followed in autumn by a purplish blue berry. Best grown in shady places on rocks. 15 cts. each, \$1.50 per dozen.

Potentilla Canadense (Common Cinquefoil) A vine having bright yellow flowers. Plant resembles the strawberry plant. Grows best in dry sunny places. 2 cts. each, \$1.00 per 100.

Ramiculas (Buttercup) 12 to 18 inches high, having yellow cup shaped, quite showy flowers, blossoming from June to August. Grow best in open sunny places.

4 cts. each, \$3.50 per 100.

Saponaria officinalis (Bouncing Bet) 16 to 24 inches high. Pink or white clustered flowers, blossoming from July to October. Grow best in dry sunny places.

2 cts. each, \$1.00 per 100.

Saxafraga Virginiana (Early Saxafrage) 4 to 10 inches high. Flowers small white and clustered. Grows on rocks, blossoming in May.

3 cts. each, \$2.00 per 100.

Sedum telephium (Live Forever) A foliage plant growing in clumps, having light green leaves.

3 cts. per clump, \$2.50 per 100.

Smilacina racemosa (False Solomon's Seal) 1 to 3 feet high. Flowers white in terminal raceme, followed in the fall by a light red berry, speckled with purple. This showy plant blossoms in May and June. Best grown in shady places.

10 cts. each, \$8.00 per 100.

Solidago (Goldenrod) Differs in height according to species. Flowers small golden yellow, blossoming in terminal raceme. Blooming from July to September. This plant grows best in dry sunny places.

3 cts. each, \$2.50 per 100.

Tiarella cordifolia (False Mitrewort) 5 to 18 inches high. Flowers small, white, blossoming in May. Should be planted in shady rocky places.

5 cts. each, \$4.00 per 100.

Trientalis Americana (Star Flower) 3 to 6 inches high. Flower white, star-shaped, blossoming in May. Grow best in moist shady places.

2 cts. each, \$1.50 per 100.

Trillium erectum (Wake Robin) 10 to 15 inches high, having three large leaves growing just below flower. Flowers purplish red, growing best in rich shady places. The Wake Robin is one of the earliest spring flowers, blooming in early May. This plant should be planted in the spring.

5 cts. each, \$4.00 per 100.

Trillium erythrocarium (Painted Trillium) 10 to 12 inches high. Flowers white painted with red at the base. Should be planted deeply in leaf-mold. Blossoms in May.

5 cts. each, \$4.00 per 100.

Verbascum thapsus (Common Mullein) Cluster of leaves growing close to the ground, with flower stalk growing from center of leaf cluster to the height of about 3 feet. Flowers yellow, blossoming in July and August. This plant grows best in sunny places.

8 cts. each, \$7.00 per 100.

Vinca minor (Blue Myrtle) Beautiful dark green evergreen vine, having purplish blue blossoms, blooming in May and June. Excellent for covering bare places.

10 cts. per clump, \$8.00 per 100.

Viola canina (Dog Violet) 3 to 8 inches high. Flowers small, pale violet having heart-shaped, wavy-toothed leaves. Blossoming in May and June. Grow best in wet shady places.

2 cts. each, \$1.50 per 100.

Viola palmata (Common Blue Violet) 5 to 8 inches high. Flowers pale blue to a deep purple. Blossoms quite large. Blooming in May and June. Grows best in open places.

2 cts. each, \$1.00 per 100.

PACKING

All plants will be packed in sphagnum moss and labeled. Precaution will be taken in packing these plants but I assume no responsibility for delays and damage in transit. All orders accepted upon condition that they shall be void should injury befall stock, from frost, fire or other causes over which I have no control. Burlapping and packing done at actual cost.
